✨ PET PROJECT SHOWCASE

Habit Tracker & Analytics

Full-stack web application built with Vanilla JS, Glassmorphic CSS3, and Supabase PostgreSQL backend.

SYSTEM ARCHITECTURE

Core Tech Stack & Layer Division

Frontend UI

Vanilla JS ES6+ modules with DOM manipulation and zero bundle dependencies.

CSS Styling

Glassmorphism design language with dynamic background patterns and keyframes.

Backend (Supabase)

PostgreSQL database with Row Level Security and native user authentication.

FUNCTIONALITY

Key Feature Overview

🔐 Auth & RLS Security

Multi-user support with isolated SQL row policies per user ID.

🔥 Dynamic Streak Engine

Algorithmic consecutive completion counter with visual flame badges.

📅 7-Day History Strip

Visual weekly progress calendar rendered directly on every card.

📊 Real-time Progress Bar

Automated percentage completion status for current daily goals.

DATA STRUCTURE

Relational Database Design

habits

id: uuid (Primary Key)

user_id: uuid (Foreign Key)

title: text

category: text

created_at: timestamp

habit_logs

id: uuid (Primary Key)

habit_id: uuid (Foreign Key)

completed_at: date

unique: (habit_id, completed_at)

Project Ready for Deployment

Fully operational codebase stored on GitHub. Prepared for portfolio deployment on Vercel or GitHub Pages.
